### Course Syllabus

**Please respect the intellectual property rights of others and do not copy any of the course information without permission**

Course Description	This course extends the principles of Finance to an international context. In an international context, investors and corporations embrace an expanded set of investment opportunities, yet they also face additional risks. The course gives an overview of international financial environment and covers issues including currency exposure, international parity conditions, foreign exchange risk management,
--------------------	--

	international asset pricing, international investment strategies, and currency hedging for international stock portfolios.	
Course Objective	The students will know how foreign exchange markets work, the factors affecting foreign exchange rate movements, and various investment vehicles for conducting international investment and hedging.	
Course Requirement	Class participation, project presentation, and examinations
