Pedagogical contribution of the course to the program

Développer un management à impact grâce aux connaissances et aux outils les plus récents dans les domaines du management

Developing a strategic and managerial vision in a complex, uncertain and changing environment

Evaluate sustainable managerial practices using managerial concepts and instruments as well as digital tools

Design solutions adapted to organizational problems by applying relevant methodologies

Développer des compétences managériales de niveau avancé se traduisant par un leadership responsable

Co-build a managerial and organizational culture through collaborations and team projects

Recommend decision making by taking a critical approach to driving change in organizations

Adopt a responsible leadership posture by being an actor in its own development and that of its teams

Mettre en place un management responsable par des pratiques reflétant les valeurs d'éthique, de diversité et de développement durable

Critically assess issues related to diversity, ethics and sustainability in the context of their professional practice

Pratiquer un management à impact dans un environnement multiculturel et international, porté par un "European mindset"

Communicate in a professional context in (foreign) languages, in writing and/or orally

Formulate solutions to organizational challenges in a multicultural and international context, driven by a "European mindset"

Description

The pervasiveness of information systems and Internet in all aspects of human society amplifies the role played by digital technologies in business and organizations. As a matter of fact, an increasing number of companies have embraced a digital transformation program in order to adapt and react to these rapid changes in the economy, but also to be more prospective and anticipate the next threats or opportunities. Issues such as disruptive technologies, e-business models, new ways of collaboration, social networks, represent important knowledge for managers. Therefore, as a future (top) manager, you need to better understand what models and tools exist to better evaluate and implement their value for your company.

Teaching methods

Face-to-face

- Lectures
- E-learning

In group

- Exercises
- Oral presentations
- Projects

Interaction

- Discussions/debates
- Games (educational, role play, simulation)

Others

No items in this list have been checked.

Learning objectives

Cognitive domain

Upon completion of this course, students should be able to

- (level 4) **Analyze** advantages and disadvantages of tools for certain business cases.

Assessment

List of assessment methods

Intermediate assessment / continuous assessment 1

Class no. 2,3,4,5
Written (15 Min.) / Individual / English / Weight : 50 %

Details :
Each session starts with a short quiz in moodle revisiting the content of the previous session as well as posing questions on the prepared material of the class of the day. Unexcused absences result in a reduction of 1 pt of the final grade. Excused absences can be compensated through bonus questions from quizzes of other sessions.
This evaluation is used to measure ILO1.2-PGE, ILO1.3-PGE, ILO3.1-PGE

Intermediate assessment / continuous assessment 2

Class no. 2,3,4,5
Written and oral (30 Min.) / Group / English / Weight : 50 %

Details :
Groups of minimum of 2 students present their results of an ongoing course project at every session. The presentation must be made available to the class 2 days before the session. Questions following the presentation will be asked by fellow students and the lecturer.
This evaluation is used to measure ILO1.1-PGE, ILO2.1-PGE, ILO2.2-PGE, ILO4.1-PGE, ILO4.2-PGE
